

“Globes of Global Warming”

Chapters are asked to create globes on Global Warming Topics of the country they have chosen for the World’s Fair Fellowship. This Project helps explore the International Service Project Operation Green: Improving Our Communities

Guidelines:

- Globes should be creative
- There should be a summary of each chapter’s globes. The summary should be on information on the topic such as facts, causes, possible solutions, and what can be done for improvement.
- Chapters will present their globes at the Leadership Conference World’s Fair as a centerpiece for the country they have chosen on September 14th.
- Globes should be no bigger than a beach ball

The Globes will be featured on the Virginia Phi Theta Kappa website

Ideas for the Globes can be:

Carbon Foot printing
Natural Heating and Cooling
Changing Your Perspective
Supporting Organic Products
Renewable Energy
Green Power
Or Other Global Warming Topics
